Board of Secondary SEducation Ravindra Bharathi High School

07/2007 - 04/2018

10 GPA

PROJECT

Android application for monitoring the child patients after discharge. (01/2024 - Present)

- **Technologies** : Android Studio (Java), PHP (Backend).
- The app includes dual login for doctors to manage patient details, medications, and follow-up questionnaires. Parents can also participate by answering questionnaires and receiving medication reminders, enhancing patient monitoring and caregiver communication.

Android Application for Convenient Car Service Management (10/2023 - 12/2023)

- **Technologies**: Android Studio (Java), PHP (Backend)
- Designed and developed Android application for car service booking with integrated payment gateway. Implemented user-friendly interfaces and ensured seamless appointment scheduling. Achieved successful completion of development phase for convenient car service management.

Ultrasonic Walking Stick for Obstacle Detection and Emergency Tracking (06/2022 - 08/2023)

- **Technologies** : IOT
- **Working**: It consists of Ultrasonic sensor, GSM and GPS module, when an obstacle is detected it gives buzzer sound in order to alert the visually impaired people. In case of emergency, a button is provided in the stick. By pressing the button, guardian will get the alert message along with the location of the person
